1. Executive Summary

RECEH Token is the official utility token powering the CryptoRECEH ecosystem — a comprehensive suite of decentralized Web3 services and infrastructure built for developers, crypto enthusiasts, and businesses seeking accessible blockchain solutions.

Unlike speculative tokens designed solely for investor attraction, RECEH is engineered with real utility at its core: enabling staking rewards, service fee payments, loyalty bonuses, DEX liquidity, and future governance within the CryptoRECEH platform network.

Token Name	RECEH	Decimals	18
Symbol	RECEH	Initial Network	Riche Chain
Total Supply	100,000,000	Secondary Network	BNB Smart Chain (BEP-20)
Token Standard	BEP-20 / Native	Listing	DEX → CEX (Q4 2026)

With a 2026 roadmap spanning four phases — from initial Riche Chain deployment to multi-chain expansion, full platform integration, and strategic CEX listings — RECEH is positioned to become the backbone utility token for a growing decentralized ecosystem.

2. Introduction & Vision

The blockchain industry has seen an explosion of tokens — the vast majority created for speculative purposes with limited real-world utility. CryptoRECEH was founded on a fundamentally different premise: that tokens should serve genuine functions within their ecosystems, creating value through usage rather than through market hype.

2.1 The Problem

Most crypto projects suffer from one or more critical deficiencies:

- Lack of genuine utility — tokens exist primarily for fundraising with no ecosystem to power.
- Inaccessible Web3 services — developers and businesses face high barriers to launching blockchain projects.
- Fragmented liquidity — tokens isolated on single chains limit adoption and trading volume.
- Opaque tokenomics — unclear allocation structures undermine community trust.

2.2 Our Solution

RECEH Token solves these problems by being intrinsically linked to a live, operational Web3 service platform. CryptoRECEH.com already offers token creation, DApp development, staking infrastructure, DEX integration, and Web3 consulting services. RECEH is the medium of exchange and reward mechanism across every one of these services.

2.3 Mission & Vision

MISSION

To build an accessible, utility-first token that powers real blockchain services and rewards genuine participation within the CryptoRECEH ecosystem.

VISION

To become the leading utility token infrastructure for Web3 service platforms in Southeast Asia and beyond, bridging the gap between blockchain technology and real-world application.

3. Project Overview

3.1 About CryptoRECEH

CryptoRECEH (cryptoreceh.com) is a comprehensive Web3 services company that has been actively building blockchain infrastructure and tools. The platform offers end-to-end services for individuals and businesses seeking to enter the decentralized economy.

SERVICE	DESCRIPTION	STATUS
Token Generator	Multi-chain token creation with customizable parameters	LIVE
Staking Platform	On-chain staking DApp with multiple lock periods and competitive APY	LIVE
DEX Integration	Decentralized exchange on Riche Chain with RECEH trading pairs	LIVE
Token Sale Platform	Launchpad DApp for public token sale events	LIVE
Cross-Chain Bridge	RECEH bridge from Riche Chain to BNB Smart Chain	Q2 2026
DApp Development	Custom Web3 DApp development and deployment services	LIVE
CEX Listings	Centralized exchange listings for broader market access	Q4 2026

4. RECEH Token Details

4.1 Technical Specifications

PARAMETER	VALUE
Token Name	RECEH
Token Symbol	RECEH
Token Standard	BEP-20 (BNB Smart Chain) / Native (Riche Chain)
Total Supply	100,000,000 RECEH (fixed — no minting)
Decimals	18
Contract Address (BSC)	0x4c9C431Fa7fD104c0E7230d20E1623E62019A1C5
Burn Mechanism	Deflationary — service fees partially burned
Security Audit	Third-party audit completed (Q1 2026)
Max Transaction	No limit — open transfer

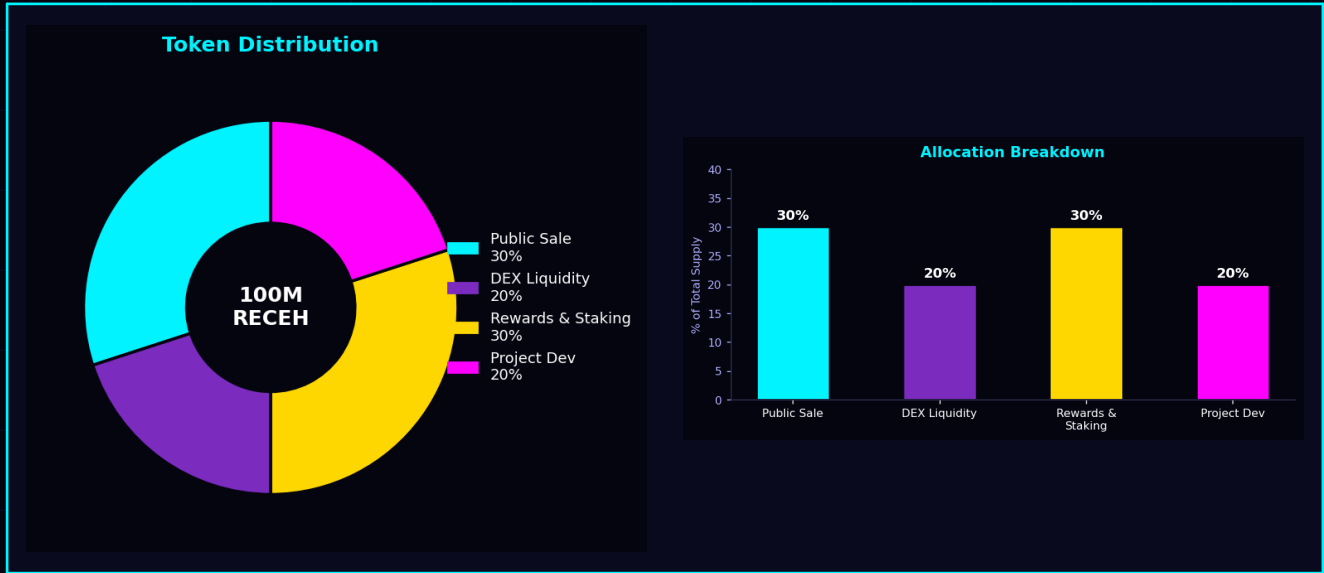

4.2 Smart Contract Security

The RECEH smart contract has undergone a comprehensive third-party security audit prior to public deployment. The contract implements industry-standard safeguards including:

- ✓ Reentrancy guards on all state-changing functions
- ✓ Fixed total supply with no minting functions — preventing inflation attacks
- ✓ Ownership transfer with 2-step confirmation process
- ✓ Anti-overflow protections via SafeMath equivalents built into Solidity 0.8.x+
- ✓ Transparent and verified source code on block explorers

5. Tokenomics & Distribution

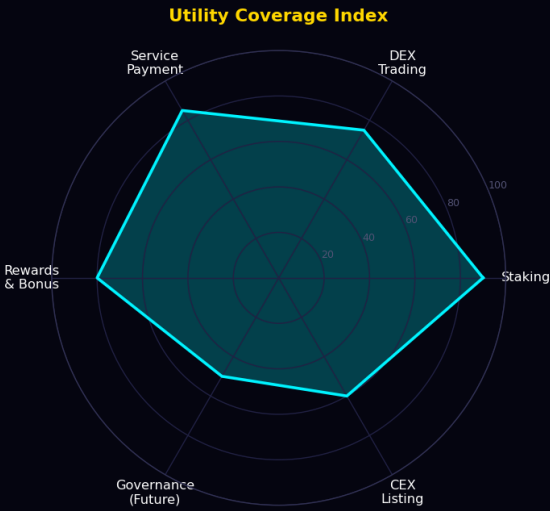

The RECEH token supply of 100,000,000 has been strategically allocated to ensure long-term ecosystem sustainability, adequate liquidity, community incentivization, and ongoing project development.

ALLOCATION	%	TOKENS	PURPOSE
Public Sale	30%	30,000,000	Community distribution via launchpad platform
DEX Liquidity	20%	20,000,000	Liquidity pools on Riche Chain DEX and PancakeSwap
Rewards & Staking	30%	30,000,000	Staking rewards, service cashbacks, loyalty bonuses
Project Development	20%	20,000,000	R&D;, platform innovation, new ecosystem expansion
TOTAL	100%	100,000,000	Full ecosystem allocation

6. Token Utility

RECEH is designed with multi-layered utility across the CryptoRECEH ecosystem. The token functions simultaneously as a payment medium, reward currency, staking asset, and future governance instrument.

STAKING REWARDS

Stake RECEH tokens to earn passive income with competitive APY rates up to 30%. Multiple periods available — from flexible to long-term commitments.

SERVICE PAYMENT

Pay for all CryptoRECEH.com services using RECEH tokens, including token creation, DApp development, smart contract deployment, and Web3 consulting.

DISCOUNT ON SERVICES

Token holders receive up to 20% discount on all platform services when paying with RECEH tokens, incentivizing ecosystem participation.

LOYALTY & BONUSSES

Long-term holders receive exclusive monthly bonuses, early access to new services, and airdrop allocations from partner projects.

DEX TRADING

RECEH is tradable on Riche Chain DEX and PancakeSwap (BNB Smart Chain), providing accessible price discovery and liquidity.

6.1 Build With RECEH

CREATE TOKEN	LAUNCH DApp	WEB3 SERVICES
Pay for multi-chain token creation using RECEH. Instant deployment with custom parameters.	Develop and launch your Web3 DApp using RECEH as payment, leveraging professional tooling.	Access all premium Web3 development and consulting services by paying with RECEH tokens.

7. Ecosystem Architecture

The RECEH ecosystem is a multi-layered architecture connecting users, services, and blockchain infrastructure through the RECEH token as its central medium.

7.1 Core Components

COMPONENT	FUNCTION	RECEH ROLE
Staking Platform	On-chain staking with variable lock periods and APY tiers	Staked asset + reward currency
Riche Chain DEX	Native decentralized exchange with RECEH trading pairs	Base trading pair + liquidity
PancakeSwap (BSC)	Major DEX on BNB Smart Chain for expanded accessibility	BEP-20 trading pair
Token Sale DApp	Launchpad for public token distribution events	Purchase medium
RECEH Bridge	Cross-chain bridge: Riche Chain ↔ BNB Smart Chain	Bridged asset (1:1)
Service Platform	Full-suite Web3 services at cryptoreceh.com	Payment + discount medium
Rewards System	Automated distribution to users, beta testers, contributors	Reward token
Partner Integrations	AVE.ai, FixSwap, RicheChain, and future partners	Cross-platform utility

7.2 Multi-Chain Strategy

RECEH adopts a multi-chain architecture to maximize accessibility and liquidity:

CHAIN	ROLE	TIMELINE
Riche Chain	Primary deployment — native DEX, staking, token sale	Q1 2026 (Live)
BNB Smart Chain	Secondary chain — PancakeSwap liquidity, CEX bridge, wider access	Q2 2026

8. Roadmap 2026

The RECEH roadmap is structured in four strategic phases across 2026, each building on the previous to create an increasingly robust and integrated ecosystem.

RECEH Roadmap 2026

PHASE 1 — Q1 2026

BUILDING ECOSYSTEM ON RICHE CHAIN

- ✓ RECEH Smart Contract deployment on Riche Chain with full audit
- ✓ Third-party security audit completed and published
- ✓ Public Sale launch through dedicated token sale DApp
- ✓ Initial liquidity provision on Riche Chain native DEX
- ✓ Staking DApp launch with multiple package options for early adopters

PHASE 2 — Q2 2026

EXPANSION TO BNB SMART CHAIN

- ✓ RECEH Bridge development: Riche Chain ↔ BNB Smart Chain
- ✓ RECEH BEP-20 token launch on BNB Smart Chain
- ✓ PancakeSwap liquidity pool creation and initial provision
- ✓ Community building campaigns across both networks
- ✓ Multi-chain wallet support integration (MetaMask, Trust Wallet)

PHASE 3 — Q3 2026

INTEGRATION ACROSS CRYPTORECEH PLATFORMS

- ✓ RECEH integration into staking platform with varied lock period packages
- ✓ Reward system activation for active CryptoRECEH service users
- ✓ Special cashback bonuses for customers using paid platform services
- ✓ Loyalty program launch — long-term holders receive monthly rewards
- ✓ New service features gated via RECEH token access

PHASE 4 — Q4 2026

PARTNERSHIPS & ECOSYSTEM DEVELOPMENT

✓ Strategic partnerships with external crypto projects and platforms ✓ CEX listings for broader market accessibility ✓ RECEH use-case expansion beyond internal CryptoRECEH ecosystem ✓ Platform UX refinement based on community feedback ✓ Mature ecosystem with proven real-world utility metrics

9. Team & Partners

9.1 Core Team

The CryptoRECEH team is composed of experienced blockchain developers, Web3 architects, and cryptocurrency market specialists with a proven track record of delivering live, operational blockchain products.

ROLE	RESPONSIBILITIES	EXPERTISE
Founder & CEO	Strategic direction, ecosystem vision, partner relations	DeFi, Web3 Business Development
Lead Smart Contract Developer	Contract architecture, security, deployment, audits	Solidity, Rust, EVM
Frontend Developer	DApp interfaces, user experience, wallet integrations	React, Web3.js, Ethers.js
Backend / DevOps	API infrastructure, bridge architecture, server operations	Node.js, Cloudflare Workers
Community & Marketing	Social media, campaigns, community engagement	Crypto Marketing, SEO, Telegram/X

9.2 Strategic Partners

CryptoRECEH has established partnerships with key players in the blockchain ecosystem:

PARTNER	TYPE	INTEGRATION
Riche Chain	Blockchain Network	Primary deployment chain for RECEH ecosystem
AVE.ai	Analytics Platform	Token data aggregation and market analytics
FixSwap	DEX Protocol	Decentralized exchange liquidity and trading pairs
PancakeSwap	DEX (BSC)	BNB Smart Chain liquidity pool (Q2 2026)

10. Legal & Risk Disclaimer

10.1 Important Notice

This whitepaper has been prepared by CryptoRECEH.com for informational purposes only. It does not constitute financial, investment, legal, or tax advice. The RECEH Token is a utility token designed to function within the CryptoRECEH ecosystem and should not be considered a security, investment contract, or any form of financial instrument regulated under applicable securities laws.

10.2 Risk Factors

- Regulatory Risk:** Cryptocurrency regulations vary by jurisdiction and may change. RECEH token holders are responsible for complying with applicable laws in their region.
- Market Risk:** Token values are subject to market volatility. Past performance does not indicate future results. Never invest more than you can afford to lose.
- Technology Risk:** Smart contracts may contain undiscovered bugs or vulnerabilities despite auditing. All on-chain interactions carry inherent technical risk.
- Liquidity Risk:** Token liquidity may be limited especially during early stages. Selling large positions may impact market price.
- Development Risk:** Roadmap timelines are projections and may change due to technical, regulatory, or resource constraints.
- No Guarantees:** CryptoRECEH makes no guarantees regarding the future value, utility, or availability of RECEH tokens.
